

	Test Name	Description	Steps	Problem
1	Liking in Buzz	Trying to like images, texts and URLs	Pressing the like button	sometimes it works but rarely it doesn't let a user to like
2	PIM employee Data	Testing if Birth of data goes past todays	Setting an employees date to go past today	"Date of brith" on PIM employee can go past todays date
3	MY info ID	Testing if it allows the same ID's be on the same user	Setting up the ID's allows another ID to be added	"Employee ID" and "Other id", can be same ID's and nothing is warned about
4	Buzz images	Buzz image posting with diffrent sizes and with background remove	Uploading an Image with diffren sizes and without a background	On some shaped images don't show in the middle of the screen. While without a background it shows a weirded shaped shadow around the image. darkening only close to the images shadows.
5	PIM Toolbar	In DevTool toggling the device toolbar finding numbers/letters mushing together.	Going in DevTool and selecting device toolbar, noticing in PIM letters/numbers on ID start to become smaller.	shrinking the device toolbar noticing on PIM it starting to mush together creating a harder view to see them.
6	PIM addign an employee	Adding an employee without an ID.	in PIM adding another employee the user can ignore adding the ID to the employee	Ignoring employee ID's
7	Buzz having no limit for text	Posting the whole script of the bee movie.	Posting in "Buzz Newsfeed" the whole script of the bee movie	It allowes to post the whole Bee movie script with no apparent problems. While the other users can't compress the massage like a "read less" button.
8	Buzz sharing button creates a easy spam option	With no apperant cooldown on how much you can spam.	pressing the share button on Buzz newsfeed.	It allowes easy spammable option for the user. Creating a massive problem for moderation.

9	Navigation not staying minimized.	Navigation while being minimized it pops back in when you try.	Minimizing the navigation when you click another page like "time", while you are in "leave". It shows itself again. Having the user to close it back away.	While Device toolbar doesn't have the problem, only if you device is vertical. When its horizontal its having the same problem like the PC website
10	Dashboard Time at work	Time at work some times doesn't show the bar being filled in when being on device toolbar	While being on Dashboard and using the device toolbar the bar on the "Time at work" sometimes doesn't show.	using Toolbar shows that "Times at work" bar not being filled in with orange lines.
